

SRINIVASULU REDDY PADEGAPATI

Associate Software Engineer | API Testing and Automation | Production Support

padegapati.reddy@mphasis.com | +91 7893463051 | Bangalore, India | [linkedin.com/in/srinivasulu-padegapa](https://www.linkedin.com/in/srinivasulu-padegapa)

PROFESSIONAL SUMMARY

Associate Software Engineer with 2 years of experience in REST API testing, Cucumber BDD automation, functional and regression testing, and production monitoring for enterprise microservices. Hands-on experience creating Gherkin scenarios, reusable step definitions, API and DB2 validations, Splunk queries, defect reports, and post-deployment checks. Familiar with AI-assisted testing and incident-triage workflows that use project documentation and operational data with human review.

TECHNICAL SKILLS

Testing: REST API Testing, Functional Testing, Regression Testing, Integration Testing, Smoke Testing, Test Design, Defect Management, Postman

Automation: Cucumber, Gherkin, BDD, Reusable Step Definitions, Test Runners, Test Data Preparation, Evidence Capture

Production Support: Splunk, SPL, Log Analysis, Incident Triage, Root Cause Analysis, Post-deployment Validation

Programming and Data: Java, Python, SQL, DB2, PowerShell

Platforms and Messaging: PCF, RabbitMQ, Spring Boot 3, Spring Cloud Stream, Centralized Configuration, CredHub

DevOps and Tools: Git, GitHub, GitHub Actions, Bamboo, Bitbucket, Jira, Confluence, Zephyr, VS Code, SAFe

AI Exposure: RAG Concepts, AI-assisted Test Generation, Incident-Triage Workflows, Human-in-the-loop Validation

PROFESSIONAL EXPERIENCE

Mphasis - Associate Software Engineer (QA)

Client: Charles Schwab, Client Data Technology | Aug 2024-Present | Bangalore, India

- Built and maintained REST API automation using Cucumber, Gherkin, reusable step definitions, and shared test utilities for functional, integration, and regression testing.
- Converted requirements and acceptance criteria into feature files covering positive, negative, boundary, authentication, error-handling, and end-to-end API scenarios.
- Automated test-data preparation, API execution, status-code and response validation, business-rule checks, DB2 verification, evidence capture, and result reporting.
- Organized automated tests using tags and runners to support smoke, targeted functional, and regression execution across sprint changes and defect fixes.
- Monitored microservices in production and lower environments using Splunk and created focused SPL queries to identify exceptions, failed transactions, configuration problems, and error patterns.
- Performed initial incident triage by correlating application logs, API behavior, database records, deployments, recent changes, and service dependencies.
- Raised Jira defects with reproducible steps, supporting evidence, observed business impact, and relevant log and transaction details.
- Validated Spring Boot 3 upgrades, RabbitMQ authentication changes, publish-and-consume flows, service startup, configuration, and regression behavior.
- Supported progressive releases by reviewing GitHub Actions and Bamboo pipeline status and completing post-deployment API, log, database, and service-health checks.
- Created a utility to verify centralized configuration status across more than 100 production services, reducing repetitive manual validation.
- Contributed to an internal dashboard that consolidated sprint, story, ownership, dependency, risk, and delivery information for multiple teams.
- Built proof-of-concept AI-assisted workflows for test-case generation and incident triage using project documentation, support history, and operational data, with human review retained for final decisions.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

QIS College of Engineering and Technology | Ongole, Andhra Pradesh
