PROFESSIONAL SUMMARY

Associate Software Engineer with two years of experience in REST API testing, Cucumber BDD automation and production support. Hands-on experience with API and DB2 validation, Splunk log analysis, incident triage and post-deployment checks for enterprise microservices.

TECHNICAL SKILLS

Testing: REST APIs, functional, regression, integration and smoke testing, Postman

Automation: Cucumber, Gherkin, Behavior-Driven Development (BDD), reusable step definitions

Production Support: Splunk, SPL, log analysis, incident triage, post-deployment validation

Programming and Data: Java, Python, PowerShell, SQL, IBM Db2 (DB2)

Platforms: Pivotal Cloud Foundry (PCF), RabbitMQ, Spring Boot 3

Delivery Tools: Git, GitHub, GitHub Actions, Bamboo, Bitbucket, Jira, Confluence, Zephyr

PROFESSIONAL EXPERIENCE

Mphasis | Associate Software Engineer (QA)

Aug 2024 - Present | Bangalore, India

Client: Charles Schwab, Client Data Technology

- Built and maintained Cucumber BDD API tests covering positive, negative and boundary scenarios, using reusable step definitions, tags and runners for smoke and regression execution.
- Automated test-data preparation, API response and business-rule checks, DB2 validation and test-result reporting.
- Used Splunk queries to investigate failed transactions and error patterns; correlated logs, API behavior, database records and recent changes during initial incident triage.
- Reported Jira defects with reproducible steps, business impact and supporting logs and transaction evidence.
- Validated Spring Boot 3 upgrades and RabbitMQ authentication changes, including message publishing and consumption, service startup and regression behavior.
- Supported releases by reviewing GitHub Actions and Bamboo pipeline status and performing post-deployment API, database, log and service-health checks.
- Created a utility to verify centralized configuration status across more than 100 production services, reducing repetitive manual validation.
- Built proof-of-concept AI-assisted workflows for test-case generation and incident triage using project documentation and operational data, retaining human review for final decisions.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

QIS College of Engineering and Technology | Ongole, Andhra Pradesh | 2022
